Experience

Google DeepMind: Senior Program Manager - GenAI Post-Training Mountain View, CA | Apr 2025 - Present

Scaling Gemini's post training program through AI agents, automation, and better processes

- Identified and launched technical solutions to scale data submissions, legal compliance, and tooling
- Creating AI agents and agentic workflows to scale work and post-training team contributions
- Created data submission improvement project to reduce data submission time from hours to minutes

OXIO: Technical Operations Team Lead

Mountain View, CA | Aug 2024 - Apr 2025

Managed and grew a technical ops team focused on customer success and product incident management

- Strategic partner to engineering and telecom teams to implement solutions from customer feedback
- Planned support headcount, simplified support tooling, and reduced escalations to engineering teams
- Identified root causes of incidents to propose company-wide product and technology solutions
- Owned relationships between major internal and external stakeholders critical to continued user growth

Meetrics AI: Co-founder, COO, & Product Management

Mountain View, CA | May 2023 - Aug 2024

Created an AI SaaS product that cut sales research time by 96% through AI-generated customer intelligence

- Created Meetrics' complex backend AI system using a network of AI agents that worked together
- Created EAP of beta testers to test new AI product capabilities through rapid iteration
- Used feedback from >1,000 user interviews to iterate the product and launch new features

Google: Senior Product Operations & Strategy Lead - Retail

Mountain View, CA | Jun 2018 - May 2023

Justified, built, and scaled the entire end-to-end Google Fi retail business from 0 to \$44M ARR

- Launching 0 to 1: Influenced leadership to enter the market by presenting data-driven recommendations
- Led engineering, product, UX, marketing XFNs to act on data-driven metrics, resulting in 80% YoY growth
- Created scaled vendor supply chain process that distributed and sold over 1M retail SIMs
- Navigated ambiguous scope by developing product strategy and roadmap w/ clear objectives to track
- Created GTM strategy, data analyses, and execution plan to target most profitable user cohorts

Shell: Process, Operations, & Project Engineer

Calgary & Ft. McMurray, Canada | Jun 2008 - May 2018

Led business-critical process and operations initiatives to optimize, troubleshoot, and continuously improve

- Reduced \$2B in scope by co-managing 70-person project team to cut 35% of original engineering design
- Returned \$50M in incremental value through leading 20+ plant process optimization initiatives
- Increased oil well revenues 500% by designing and implementing technical upgrades to equipment

Education & Training

McGill University - Bachelor of Engineering, Chemical

Montreal, Canada | Aug 2004 - Jun 2008

APM - PMQ (Project Management Qualification)

The Hauge, Netherlands | Jan 2014

SQL - SQL for Data Science (Coursera, UC Davis)

Online | Dec 2020

Skills

Soft: Teamwork, critical thinking, problem solving | **Hard:** Operations, data analysis, strategy, OKRs, process

Programs: Gemini, Cursor, OpenAI, Claude, Slack, GSuite, Smartsheet, Notion, Jira, Asana, Figma

Coding: Self-learning HTML, CSS, and JavaScript through The Odin Project + AI help!
